Base Installation Instructions (ex, wood ceiling)

TAP6090/TAP30

TA6090/TA4560

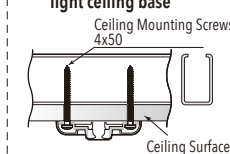

When mounting on a light ceiling base

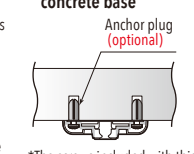

*The included mounting screws (φ4×50) can be used.

When mounting on a light ceiling base

When mounting on a concrete base

*The screws included with this product cannot be used. Please purchase appropriate screws.

Warning

- Please be sure to use a laundry pole. If you use a rope or a string, it may cause breakage or breakdown of the main base unit.
- Maximum load weight for this base unit is 8kg. If you hang anything over the weight, it may cause breakage or breakdown of the main unit.
- When using two base units, total load should not exceed 8kg including the laundry pole.
- The pole height should be adjusted with appropriate method. If not, it may cause breakage or breakdown of the main unit.
- Actual color might slightly be changed from the picture.
- When your ceiling base is made with either light base or concrete, please consult a specialist.
- Please do not use electric power tools only.
- Be sure to stop before the end of the tightening of the screws and use a hand tool to screw tightly.

- 1 Please check the specifications of the ceiling.
- 2 Use a driver and use proper fastener to mount the base on your ceiling.
- 3 Once you have mounted the base firmly, put the base cover on.
